PROFESSIONAL SUMMARY

Computational Data Science M.S. candidate targeting Data Scientist at Applied Materials, with hands-on Python, statistical analysis, anomaly detection, machine learning coursework, and NLP/LLM workflow experience. Brings manufacturing and engineering analytics experience translating complex datasets into reliable insights.

EDUCATION

University of California, Riverside - M.S. Computational Data Science GPA: 3.78/4.00 Coursework: Machine Learning, Data Analytics and Exploration, Databases, Artificial Intelligence, NLP, Data Mining, Data Ethics	Expected Jan 2027
College of Engineering Pune (COEP) - B.Tech. Electrical Engineering GPA: 7.86/10 Coursework: DSA, Probability & Statistics, Embedded Systems, Analog/Digital Electronics, PCB Design, Circuit Integration, System Validation	Graduated Aug 2024

TECHNICAL SKILLS

Programming & Databases: SQL, Python, PostgreSQL, MySQL, SQL Server, PySpark, R, MATLAB, C/C++
Analytics & Statistics: Data Quality Analysis, Statistical Analysis, Dashboard Development, Data Validation, Exploratory Data Analysis, KPI Reporting, Business Intelligence, Anomaly Detection, Feature Engineering, Machine Learning, Model Evaluation, Root Cause Analysis
Business & Operations: Manufacturing Analytics, Operations Analytics, Production Analytics, Supply Chain Analytics, Inventory Analytics, Procurement Analytics, Process Improvement, SAP
Tools & AI: Pandas, NumPy, Scikit-learn, Docker, Hadoop, Flask, Git, Matplotlib, Gemini API, NLP, Large Language Models

PROFESSIONAL EXPERIENCE

Bajaj Auto Limited Graduate Trainee Engineer - Developed Python-based reporting, validation, and data quality pipelines for manufacturing operations, reducing manual reporting effort by 40% and improving standardized analytics reliability. - Queried and analyzed SAP BOM, procurement, inventory, and production datasets using SQL and Python to support production planning across 200+ components. - Built KPI dashboards tracking production throughput, quality metrics, process deviations, and operational efficiency, enabling faster identification of corrective actions. - Performed exploratory, statistical, and anomaly analysis for AMR deployment, identifying process bottlenecks, operational deviations, and optimization opportunities.	Aug 2024 - Aug 2025
Rolls-Royce Power Systems AG Engineering Intern - Analyzed engineering test, validation, and simulation datasets to identify anomaly patterns, failure trends, quality risks, and system performance drivers. - Automated Python engineering analysis workflows and simulation tooling for mtu S1600 engine validation, reducing validation cycle time by 85%. - Applied statistical analysis and data profiling to investigate performance deviations, support root cause analysis, and translate findings into technical documentation and optimization recommendations.	Jan 2024 - Jun 2024
APTIV Summer Intern - Designed vehicle wire harnesses with CATIA and LDorado for Volkswagen and BMW; supported validation, technical documentation, and change management activities.	May 2023 - Jul 2023

CAMPUS EXPERIENCE

BUS173: Introduction to Databases for Management Grader, UCR - Evaluated SQL assignments involving relational databases, joins, aggregations, query optimization, database design concepts, and structured query development.	Winter 2026
BUS175: Business Data Communications Grader, UCR - Supported instruction in Python-based analytics, data transformation, visualization, and business intelligence workflows.	Spring 2026

PROJECTS

AI-Powered Research Proposal Workflow Agent Python, Gemini API, LLMs, NLP - Built a Gemini-powered workflow assistant for proposal planning, drafting, revision, evaluation, structured quality assessment, automated feedback, and recommendation generation.	In Progress
Hotel Reservation Analytics Platform SQL, PostgreSQL, Flask, Hadoop, Docker - Built a PostgreSQL-Flask analytics platform for querying and visualizing reservation data with dynamic SQL filtering across pricing, booking, and customer dimensions.
