## PROFESSIONAL SUMMARY

Computational Data Science M.S. candidate targeting Data Analyst - Kiewit Data Services Job Details | Kiewit at Kiewit, with experience in SQL, Python, data quality, KPI reporting, dashboards, statistical analysis, and business intelligence. Proven ability to transform operational and engineering datasets into actionable insights.

## EDUCATION

|                                                                                                                                                                                                                                          |                    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| <b>University of California, Riverside - M.S. Computational Data Science   GPA: 3.78/4.00</b><br>Coursework: Machine Learning, Data Analytics and Exploration, Databases, Artificial Intelligence, NLP, Data Mining, Data Ethics         | Expected Jan 2027  |
| <b>College of Engineering Pune (COEP) - B.Tech. Electrical Engineering   GPA: 7.86/10</b><br>Coursework: DSA, Probability & Statistics, Embedded Systems, Analog/Digital Electronics, PCB Design, Circuit Integration, System Validation | Graduated Aug 2024 |

## TECHNICAL SKILLS

**Programming & Databases:** SQL, Python, PostgreSQL, MySQL, SQL Server, PySpark, R, MATLAB, C/C++  
**Analytics & Statistics:** Data Quality Analysis, Statistical Analysis, Dashboard Development, Data Validation, Exploratory Data Analysis, KPI Reporting, Business Intelligence, Anomaly Detection, Feature Engineering, Machine Learning, Model Evaluation, Root Cause Analysis  
**Business & Operations:** Manufacturing Analytics, Operations Analytics, Production Analytics, Supply Chain Analytics, Inventory Analytics, Procurement Analytics, Process Improvement, SAP  
**Tools & AI:** Pandas, NumPy, Scikit-learn, Docker, Hadoop, Flask, Git, Matplotlib, Gemini API, NLP, Large Language Models

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Bajaj Auto Limited   Graduate Trainee Engineer</b><br>- Developed Python-based reporting, validation, and data quality pipelines for manufacturing operations, reducing manual reporting effort by 40% and improving standardized analytics reliability.<br>- Queried and analyzed SAP BOM, procurement, inventory, and production datasets using SQL and Python to support production planning across 200+ components.<br>- Built KPI dashboards tracking production throughput, quality metrics, process deviations, and operational efficiency, enabling faster identification of corrective actions.<br>- Performed exploratory, statistical, and anomaly analysis for AMR deployment, identifying process bottlenecks, operational deviations, and optimization opportunities. | Aug 2024 - Aug 2025 |
| <b>Rolls-Royce Power Systems AG   Engineering Intern</b><br>- Automated Python engineering analysis workflows and simulation tooling for mtu S1600 engine validation, reducing validation cycle time by 85%.<br>- Analyzed engineering test, validation, and simulation datasets to identify anomaly patterns, failure trends, quality risks, and system performance drivers.<br>- Applied statistical analysis and data profiling to investigate performance deviations, support root cause analysis, and translate findings into technical documentation and optimization recommendations.                                                                                                                                                                                           | Jan 2024 - Jun 2024 |
| <b>APTIV   Summer Intern</b><br>- Designed vehicle wire harnesses with CATIA and LDorado for Volkswagen and BMW; supported validation, technical documentation, and change management activities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | May 2023 - Jul 2023 |

## CAMPUS EXPERIENCE

|                                                                                                                                                                                                                                           |             |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>BUS173: Introduction to Databases for Management   Grader, UCR</b><br>- Evaluated SQL assignments involving relational databases, joins, aggregations, query optimization, database design concepts, and structured query development. | Winter 2026 |
| <b>BUS175: Business Data Communications   Grader, UCR</b><br>- Supported instruction in Python-based analytics, data transformation, visualization, and business intelligence workflows.                                                  | Spring 2026 |

## PROJECTS

|                                                                                                                                                                                                                                                                            |             |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>AI-Powered Research Proposal Workflow Agent   Python, Gemini API, LLMs, NLP</b><br>- Built a Gemini-powered workflow assistant for proposal planning, drafting, revision, evaluation, structured quality assessment, automated feedback, and recommendation generation. | In Progress |
| <b>Hotel Reservation Analytics Platform   SQL, PostgreSQL, Flask, Hadoop, Docker</b><br>- Built a PostgreSQL-Flask analytics platform for querying and visualizing reservation data with dynamic SQL filtering across pricing, booking, and customer dimensions.           |             |
