## PROFESSIONAL SUMMARY

Computational Data Science M.S. candidate targeting Business Intelligence Engineer, Listing Analytics at Amazon, with experience building Python reporting, validation, and data quality pipelines across manufacturing operations. Skilled in SQL, Python, R, MATLAB, Reporting, Dashboard Development, Business Intelligence, with project experience in PostgreSQL, Flask, Hadoop, and Docker analytics workflows.

## EDUCATION

|                                                                                                                                                                                                                                          |                    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| <b>University of California, Riverside - M.S. Computational Data Science   GPA: 3.78/4.00</b><br>Coursework: Machine Learning, Data Analytics and Exploration, Databases, Artificial Intelligence, NLP, Data Mining, Data Ethics         | Expected Jan 2027  |
| <b>College of Engineering Pune (COEP) - B.Tech. Electrical Engineering   GPA: 7.86/10</b><br>Coursework: DSA, Probability & Statistics, Embedded Systems, Analog/Digital Electronics, PCB Design, Circuit Integration, System Validation | Graduated Aug 2024 |

## TECHNICAL SKILLS

**Programming & Databases:** SQL, Python, R, MATLAB, PostgreSQL, MySQL, SQL Server, PySpark, C/C++  
**Analytics & Statistics:** Data Quality Analysis, Statistical Analysis, Dashboard Development, Business Intelligence, Data Validation, Exploratory Data Analysis, KPI Reporting, Anomaly Detection, Feature Engineering, Machine Learning, Model Evaluation, Root Cause Analysis  
**Business & Operations:** Manufacturing Analytics, Operations Analytics, Production Analytics, Supply Chain Analytics, Inventory Analytics, Procurement Analytics, Process Improvement, SAP  
**Tools & AI:** Pandas, NumPy, Scikit-learn, Docker, Hadoop, Flask, Git, Matplotlib, Gemini API, NLP, Large Language Models

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Bajaj Auto Limited   Graduate Trainee Engineer</b><br>- Developed Python-based reporting, validation, and data quality pipelines for manufacturing operations, reducing manual reporting effort by 40% and improving standardized analytics reliability.<br>- Queried and analyzed SAP BOM, procurement, inventory, and production datasets using SQL and Python to support production planning across 200+ components.<br>- Built KPI dashboards tracking production throughput, quality metrics, process deviations, and operational efficiency, enabling faster identification of corrective actions.<br>- Performed exploratory, statistical, and anomaly analysis for AMR deployment, identifying process bottlenecks, operational deviations, and optimization opportunities. | Aug 2024 - Aug 2025 |
| <b>Rolls-Royce Power Systems AG   Engineering Intern</b><br>- Automated Python engineering analysis workflows and simulation tooling for mtu S1600 engine validation, reducing validation cycle time by 85%.<br>- Analyzed engineering test, validation, and simulation datasets to identify anomaly patterns, failure trends, quality risks, and system performance drivers.<br>- Applied statistical analysis and data profiling to investigate performance deviations, support root cause analysis, and translate findings into technical documentation and optimization recommendations.                                                                                                                                                                                           | Jan 2024 - Jun 2024 |
| <b>APTIV   Summer Intern</b><br>- Designed vehicle wire harnesses with CATIA and LDorado for Volkswagen and BMW; supported validation, technical documentation, and change management activities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | May 2023 - Jul 2023 |

## CAMPUS EXPERIENCE

|                                                                                                                                                                                                                                           |             |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>BUS173: Introduction to Databases for Management   Grader, UCR</b><br>- Evaluated SQL assignments involving relational databases, joins, aggregations, query optimization, database design concepts, and structured query development. | Winter 2026 |
| <b>BUS175: Business Data Communications   Grader, UCR</b><br>- Supported instruction in Python-based analytics, data transformation, visualization, and business intelligence workflows.                                                  | Spring 2026 |

## PROJECTS

|                                                                                                                                                                                                                                                                              |             |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>AI-Powered Research Proposal Workflow Agent   Python, Gemini API, LLMs, NLP</b><br>- Built a PostgreSQL-Flask analytics platform for querying and visualizing reservation data with dynamic SQL filtering across pricing, booking, and customer dimensions.               | In Progress |
| <b>Hotel Reservation Analytics Platform   SQL, PostgreSQL, Flask, Hadoop, Docker</b><br>- Built a Gemini-powered workflow assistant for proposal planning, drafting, revision, evaluation, structured quality assessment, automated feedback, and recommendation generation. |             |
