PROFESSIONAL SUMMARY

Computational Data Science M.S. candidate targeting Business Analyst, HR Technology at Applied Materials, with experience in SQL, Python, data quality, KPI reporting, dashboards, statistical analysis, and business intelligence. Proven ability to transform operational and engineering datasets into actionable insights.

EDUCATION

University of California, Riverside - M.S. Computational Data Science GPA: 3.78/4.00	Expected Jan 2027
Coursework: Machine Learning, Data Analytics and Exploration, Databases, Artificial Intelligence, NLP, Data Mining, Data Ethics	
College of Engineering Pune (COEP) - B.Tech. Electrical Engineering GPA: 7.86/10	Graduated Aug 2024
Coursework: DSA, Probability & Statistics, Embedded Systems, Analog/Digital Electronics, PCB Design, Circuit Integration, System Validation	

TECHNICAL SKILLS

Programming & Databases: SQL, Python, PostgreSQL, MySQL, SQL Server, PySpark, R, MATLAB, C/C++
Analytics & Statistics: Data Quality Analysis, Statistical Analysis, Dashboard Development, Data Validation, Exploratory Data Analysis, KPI Reporting, Business Intelligence, Anomaly Detection, Feature Engineering, Machine Learning, Model Evaluation, Root Cause Analysis
Business & Operations: Process Improvement, Manufacturing Analytics, Operations Analytics, Production Analytics, Supply Chain Analytics, Inventory Analytics, Procurement Analytics, SAP
Tools & AI: Pandas, NumPy, Scikit-learn, Docker, Hadoop, Flask, Git, Matplotlib, Gemini API, NLP, Large Language Models

PROFESSIONAL EXPERIENCE

Bajaj Auto Limited Graduate Trainee Engineer	Aug 2024 - Aug 2025
- Developed Python-based reporting, validation, and data quality pipelines for manufacturing operations, reducing manual reporting effort by 40% and improving standardized analytics reliability. - Queried and analyzed SAP BOM, procurement, inventory, and production datasets using SQL and Python to support production planning across 200+ components. - Built KPI dashboards tracking production throughput, quality metrics, process deviations, and operational efficiency, enabling faster identification of corrective actions. - Performed exploratory, statistical, and anomaly analysis for AMR deployment, identifying process bottlenecks, operational deviations, and optimization opportunities.	
Rolls-Royce Power Systems AG Engineering Intern	Jan 2024 - Jun 2024
- Automated Python engineering analysis workflows and simulation tooling for mtu S1600 engine validation, reducing validation cycle time by 85%. - Analyzed engineering test, validation, and simulation datasets to identify anomaly patterns, failure trends, quality risks, and system performance drivers. - Applied statistical analysis and data profiling to investigate performance deviations, support root cause analysis, and translate findings into technical documentation and optimization recommendations.	
APTIV Summer Intern	May 2023 - Jul 2023
- Designed vehicle wire harnesses with CATIA and LDorado for Volkswagen and BMW; supported validation, technical documentation, and change management activities.	

CAMPUS EXPERIENCE

BUS173: Introduction to Databases for Management Grader, UCR	Winter 2026
- Evaluated SQL assignments involving relational databases, joins, aggregations, query optimization, database design concepts, and structured query development.	
BUS175: Business Data Communications Grader, UCR	Spring 2026
- Supported instruction in Python-based analytics, data transformation, visualization, and business intelligence workflows.	

PROJECTS

AI-Powered Research Proposal Workflow Agent Python, Gemini API, LLMs, NLP	In Progress
- Built a Gemini-powered workflow assistant for proposal planning, drafting, revision, evaluation, structured quality assessment, automated feedback, and recommendation generation.	
Hotel Reservation Analytics Platform SQL, PostgreSQL, Flask, Hadoop, Docker	
- Built a PostgreSQL-Flask analytics platform for querying and visualizing reservation data with dynamic SQL filtering across pricing, booking, and customer dimensions.
