PROFESSIONAL SUMMARY

MS Computational Data Science student with manufacturing analytics experience across Rolls-Royce and Bajaj Auto. Skilled in SQL, Python, SAP, data quality analysis, statistical analytics, dashboarding, anomaly detection, and process optimization, with experience transforming operational, manufacturing, and engineering datasets into actionable insights.

EDUCATION

University of California, Riverside
M.S. Computational Data Science | GPA: 3.78/4.00
Coursework: ML, Data Analytics and Exploration, Databases, Artificial Intelligence, NLP, Data Mining, Data Ethics
College of Engineering Pune (COEP)
B.Tech. Electrical Engineering | GPA: 7.86/10
Coursework: DSA, Probability & Statistics, Embedded Systems, Analog/Digital Electronics, PCB Design, Circuit Integration, Hardware Debugging, System Validation

Expected Mar 2027
Riverside, CA

Graduated in Aug 2024
India

TECHNICAL SKILLS

Programming & Databases: SQL, PostgreSQL, MySQL, SQL Server, Python, PySpark, MATLAB, C/C++, R
Data Analytics & Statistics: Statistical Analysis, Data Quality Analysis, Exploratory Data Analysis (EDA), Variance Analysis, Outlier Detection, Anomaly Detection, Feature Engineering, Machine Learning, PCA, Model Evaluation, z score analysis
Business & Manufacturing Analytics: KPI Reporting, Dashboard Development, Root Cause Analysis, Process Improvement, Production Analytics, Supply Chain Analytics, Manufacturing Operations, Data Governance
AI & Generative AI: Large Language Models (LLMs), Prompt Engineering, NLP Workflows, Gemini API, Prompt Engineering
Tools & Platforms: Pandas, NumPy, Scikit-learn, Docker, SAP, Excel, Flask, Git, Matplotlib

PROFESSIONAL EXPERIENCE

Bajaj Auto Limited | Graduate Trainee Engineer
Aug 2024 – Aug 2025
Developed Python-based reporting, validation, and data quality pipelines for manufacturing operations, reducing manual reporting effort by 40% while supporting standardized manufacturing reporting and data quality practices. Queried and analyzed SAP BOM, procurement, inventory, and production datasets using SQL and Python to support production planning across 200+ components. Performed exploratory, statistical, and anomaly analysis for AMR deployment, identifying process bottlenecks, operational deviations, and optimization opportunities. Built KPI dashboards tracking production throughput, quality metrics, process deviations, and operational efficiency, enabling faster identification of corrective actions. Partnered with production, planning, and procurement teams to drive data-driven process improvements and manufacturing performance optimization.

Rolls-Royce Power Systems AG | Engineering Intern
Jan 2024 – Jun 2024
Automated engineering analysis workflows using Python simulation tools, reducing validation cycle time by 85%. Conducted performance, failure, and validation analysis for mtu S1600 engine overheating mitigation initiatives. Analyzed engineering test, validation, and simulation datasets to identify anomaly patterns, failure trends, and quality risks impacting system performance. Applied statistical analysis and data profiling techniques to investigate performance deviations and support root cause investigations. Authored technical documentation and white papers summarizing methodologies, findings, and optimization recommendations.

APTIV | Summer Intern
May 2023 – Jul 2023
Designed vehicle wire harness with CATIA and LDorado for Volkswagen and BMW. Supported validation, technical documentation and change management activities.

CAMPUS EXPERIENCE

BUS173: Introduction to Databases for Management | Grader (UCR)
Winter 2026
Evaluated SQL assignments involving relational databases, joins, aggregations, query optimization, database design concepts and structured query development.

BUS175: Business Data Communications | Grader (UCR)
Spring 2026
Supported instruction in Python-based analytics, data transformation, visualization, and business intelligence workflows.

PROJECTS

AI-Powered Research Proposal Workflow Agent | Python, Gemini API, LLMs, NLP(In Progress)
Built a Gemini powered workflow assistant to automate proposal planning, drafting, revision, evaluation, and recommendation generation. Developed prompt-engineering pipelines for content generation, structured quality assessment, and automated feedback workflows. Generated review summaries, evaluation artifacts, and AI-assisted recommendations to improve proposal quality and consistency.

Hotel Reservation Analytics Platform | SQL, PostgreSQL, Flask, Hadoop, Docker
Built a PostgreSQL-Flask analytics platform for querying and visualizing hotel reservation data. Developed dynamic SQL filtering workflows across pricing, booking, and customer dimensions. Utilized Hadoop and Docker for scalable processing and deployment.
